Subject: Things 4 Se Sampling 2021

Dear All:

Yesterday Holly provided me notes on the selenium call last week Wednesday. It woke me up that there is not a lot of time to get everything ready. Spring is nearly here. In the next 3 to 4 weeks a QAPP with appropriate SOPs will need to get put together and any missing supplies ordered.

List of things I could use help with:

- 1) Methods for Water and Fish:
 - a. Flesh: Confirm that 30.50.B is appropriate.
 - i. Holding time once prepped and frozen
 - b. Water: Dissolved and 200.8 or 200.9?
- 2) SOPs for flesh (I believe someone offered to Region 10 or Montana's QAPP and SOPs)
 - a. Field Prep (This is very important. The state lab will deliver I can get them a good sample.
 - i. Ice or do we need to freeze (dry ice) in the field.
 - ii. How to bag (Plastic or glass?)
 - iii. Prep (grinder or hand homogenizing?)
 - iv. Stainless steel equipment?
- 3) Target Species
 - a. Which species should be targeted Based on the attached fish list

Obviously more stuff will surface but this should get us going.

My hope is if there are at least a few species (based on eating habits) that might shed additional light for criteria development. If so we target additional samples to develop a subset of these animals as well.

Pete

Subject: Eco 46 Fish Data 2016

Good Afternoon,

I have attached the excel file with 2016 fish data for eco 46. If there is any other information that you would like just let me know.

Josh
